# Number Display

Targeted mainly towards Cafes & Bistros this is a **complete stand alone system** that allows either kitchen staff or POS operators to display ready order numbers to the people awaiting the order.

This product requires 2 Android devices to run, a sender and a receiver. The sender is a small screen device used for the keypad to type in and clear off the numbers. The receiver is typically an Android device plugged into the side of a small monitor, the screen size of the receiver can be anywhere from 4" all the way past 70".

The devices communicate via a Wi-Fi router, all the equipment is supplied and setup prior to shipment to your specifications, this unit is **designed to run out of the box** as a standalone system.

## Features Include:

- Full Screen Number
- 10 Ready Orders listed down the side
- Advertisement Text to display anything you like
- Different Coloured Backgrounds and Text
- Automatic Deletion after a set time
- Adjustable Number Scroll Frequency
- Features can be Password Protected.
